

Multi Panel options - SIMATIC WinAC MP

Overview

- The software PLC which runs under Windows CE and can be installed on the multifunctional platform MP 370 12" and MP 370 15"
- The cost-optimized solution for deterministic processes in conjunction with a rugged hardware platform. At the same time it is ideal for applications in which large amounts of data are processed.
- Ideal for tasks directly at the machine when a user-friendly user interface is extremely important or the control task demand large programs and extensive data memory.
