

SIMATIC S5 - S5-90U, S5-95U/F, S5-100U

Area of application

S5-90U/S5-95U

The S5-90U and S5-95U programmable controllers are compact mini PLCs used for the economical solution of simple automation tasks. They can be employed for control tasks that are of a simple structure and where little space is available for their installation.

S5-95F

The S5-95F programmable controller is a fail-safe mini PLC for the lower application range.

S5-100U

The S5-100U programmable controller is suitable for the solution of the most varied types of automation tasks. The S5-100U has a modular design.
